Dear Wayne Brigden,

**THE RAILWAYS (INTEROPERABILITY) REGULATIONS 2011, AS AMENDED**

**CVL- ELECTRIFICATION OF THE TAM-A EE1A, 1B AND 1C WORKS THAT HAS BEEN RECORDED IN SJR72**

I refer to your application for authorisation, received on the 24th October 2024. Following review of your application grants a first authorisation under regulation 4(1)(a) of the Railways (Interoperability) Regulations 2011, as amended.

This authorisation is for the placing in service of CVL - electrification of the TAM-A EE1A, 1B and 1C works that have been recorded in SJR72.

- ELR: RAD 1 mile 39 chains to 4 miles 41 chains
- ELR: CAM 2 miles 55 chains to 11 miles 67 chains
- ELR: CAM 13 miles 47 chains to 24 miles 12 chains
- ELR: ABD 16 mile 26 chains to VON 22miles 41 chains (including ALK and MOA.)

The restrictions or limitations of use on the structural subsystem are those contained on the UK declaration of verification TRAN01-KAW-ZZ-CVL-UPF-Z-MF-000162 and contained in technical file ApBo DeBo Technical File ACS3167R44, Issue 1, Dated 22 October 2024.

We note the SAR is conditional upon the project satisfactorily resolving dependencies recorded in the Declaration of Control of Risk, AIW-HSEQ-02-FO09.

The Infrastructure / Energy subsystem authorised by this letter must be operated and maintained in accordance with Regulation 20.

You should be aware that any future modifications to the authorised subsystem may constitute a further 'renewal' or an 'upgrade' as defined in Regulation 2. If a project entity, in relation to the project, considers that the modification meets either of these

definitions they may apply, in accordance with the provisions of Regulation 13, to the Department for Transport (DfT) for a decision on whether a new authorisation will be required. Should DfT decide that an authorisation is not required they must consult with ORR whether authorisation is required on safety grounds.

As the project entity you are responsible for retaining the technical file, keeping it up to date and making it available to the ORR in accordance with Regulations 18 and 19.

If you are not the owner of the authorised subsystem you shall within 60 days, in accordance with Regulation 19(3), transfer the technical file, certificate of verification and verification declaration to the owner of the subsystem and the owner shall then be regarded as the project entity. If the owner, in accordance with Regulation 19(4), disposes of his interest in the authorised subsystem, he shall within 60 days of the disposal transfer the technical file, certificate of verification and verification declaration to the person acquiring that interest and that person shall be regarded as the project entity.

Please note that the person who applied for the authorisation shall send particulars to the owner of the infrastructure to enable the owner of the infrastructure to enter the items on the Register of Infrastructure in accordance with Table 1 Commission Implementing Decision 2011/633/EU. This will include such further information as the registration entity may reasonably require set out in the relevant standard.

The person who applied for the authorisation to place in service may apply to the ORR for a determination of type. You will receive the type authorisation after providing the relevant data to the ORR.

If you are the operator, may I remind you of the need to have adequate arrangements within your Safety Management System to control the risks associated with this renewed infrastructure subsystem.

This decision letter will be published on ORR's website.

Yours sincerely

**Steve Fletcher**

**Deputy Director, Engineering & Asset Management**
