# 1. Introduction

---

## Summary

1.1 This document provides the price lists with indicative prices consistent with our draft determinations published on 5 June 2008. It consists of:

- variable usage charges
  - Variable usage charges (compared with current charges (2006-07) and Network Rail's SBP update proposal) for passenger train operators;
  - Variable usage charges (compared with current charges (2006-07) and Network Rail's SBP update proposal) for freight train operators;
- traction electricity charge
  - estimated price matrix;
  - regenerative braking discounts;
- schedule of fixed track access charges for franchised passenger train operators; and
- station long term charges.

1.2 A number of outstanding price list issues remain as described in Chapter 19 of the draft determinations. In particular:

- Network Rail will consult on the freight suspension band discounts in July 2008.
- Network Rail will consult on its new traction electricity consumption rates in July 2008.
- Network Rail will consult on the revised list of average capacity charge rates in July 2008 following the completion of the performance regime recalibration of benchmarks.
- We will consult on drafting changes to Schedule 7 (the charging schedule) of track access contracts on 17 July 2008.

- 1.3 These prices are indicative at this stage, they have been calculated consistent with our draft determinations but specific prices may still change in the remaining process and we will discuss any issues/concerns raised in response to the draft determinations with consultees. The rows and columns in the tables may not add up to the totals because of rounding.
- 1.4 The final price lists will be produced before the final determinations by Network Rail and an audit will then take place between October and December 2008 before the price lists are published as part of the review notice changes (see Chapter 29 of the draft determinations for more details).
- 1.5 All numbers throughout this document are in 2006-07 prices unless other stated.

## 2. Variable usage charges

### Proposed franchised passenger vehicle rates

2.1 Table 2.1 presents the variable usage charges for passenger vehicles consistent with the draft determinations compared to the current tariff and Network Rail's SBP update proposal. Tariffs in Table 2.1 are in pence per vehicle mile and the tariffs in Table 2.2 are in pounds per thousand gross tonne miles.

**Table 2.1: variable usage charges for passenger vehicles**

## Proposed freight vehicle rates

2.2 The proposed freight variable usage charge rates in Table 2.2 exclude the effect of coal spillage, the suspension banding discount or the freight only line charge.

**Table 2.2: variable usage charges for freight vehicles (without any adjustment for coal spillage, suspension banding discount or freight only line charge)**

## Electrification asset usage charge

2.3 The electrification asset usage charge is to be charged as follows

**Table 2.3: Electrification asset usage charge**

DC (third rail) network	OLE (AC) network
0.39 pence per vehicle mile	1.02 pence per vehicle mile

## 3. Traction electricity charges

---

### Traction electricity charge tariffs

- 3.1 This chapter sets out indicative traction electricity Tariffs in 2006-07 prices and the table of regenerative braking discounts. As the traction electricity costs to Network Rail will change over time this tariff table is indicative. The level will almost certainly change with changes in costs. The table provides an indication of the differential in rates by traction electricity region or ESTA and time of year and day. The table reproduces Network Rail's median forecast 2009-10 tariffs

**Table 3.1: traction electricity charge, predicted tariff rates**

### Regenerative braking

3.2 The table below sets out our draft determination to accept Network Rail’s proposal in relation to regenerative braking discounts. This includes Network Rail’s proposal that where a train operator provides supporting information to suggest a higher effect of regenerative braking, through the use of metering, this will be taken into account in determining the discount.

**Table 3.2: Discounts applicable for use of regenerative braking**

Type of infrastructure/service frequency	CP4 discount
AC, long distance (more than 10 miles between stations)	16%
AC, regional and outer suburban (less than or equal to 10 miles between stations)	18%
AC, Local and commuter (less than or equal to 2.1 miles between stations)	20%
DC, Southern region Central ESTA	15%
Rest of DC	5%

## 4. Fixed track access charges

4.1 The schedule of fixed charges is provided in the table below. This retains the relative proportions between franchised passenger operators as the output of Network Rail's model but adjusts the overall total for our draft determinations including, in the first table, the amount of network grant being paid. These are rounded to the nearest £m. Two tables are presented, one with the network grant and fixed charge as set out in Table 9 of the draft determinations and the other with the network grant set to zero.

**Table 4.1: schedule of fixed charges (assuming network grant as in draft determinations)**

<b>Franchised passenger train operator</b>	<b>2009-10</b>	<b>2010-11</b>	<b>2011-12</b>	<b>2012-13</b>	<b>2013-14</b>	<b>Total</b>

## 5. Station long term charges

---

- 5.1 Two tables are presented below. The first sets out the station long term charges for each station. This is presented by station facility owner (SFO) and only relates to the stations where franchised passenger operators are SFO.
- 5.2 The second table presents Network Rail's proposed station expenditure by franchisees adjusted for the efficiency expectation in our draft determinations. The station long term charges in table 1 is based on this expenditure in table 2.

**Table 5.1: Indicative average station long term charges**
